### Myande Launches New E-Type Extractor

On 22nd June, at the ceremony held in Myande manufacturing base to celebrate successful launch of Myande's new E-type extractor, Mr. Wang Ruiyuan, Chief Scientist of China Cereals and Oil Association made the following remark.

Competition is becoming more and more intense. Only those enterprises with core competitiveness can survive and develop. After years of independent research and development, Myande has developed finally launched the fifth generation new type extractor. This event represents a fine example of Chinese companies' initiative to enhance their core competitiveness on the global market. This event is symbolic of the fact that China possesses core equipment of

independent intellectual property in oils & fats processing industry.

Over 50 representatives from prestigious vegetal oil processing enterprises, including Hopeful Grains and Oils, Jiusan Group, COFCO, SINOGRain, Bei Guwan Oils and Fats, Yihai Kerry, Bunge, Cargill and Louis Dreyfus, participated in the event. After close inspection of the 3000 TPD E-type extractor displayed at the launch site, which will soon be shipped to its overseas user, most representatives gave high comments both during the event and at the technical discussion session following it.

## Myande Supplied Two Sets of 15TPH Maltose Evaporation System

On March 28, 2018, 2 sets of 15TPH maltose evaporation system provided by Myande Group to Hebei Derui Starch Co., Ltd. were put into operation successfully. Hebei Derui Starch Co., Ltd. is our long-term partner and we have been providing corn starch processing equipment for it, such as centrifuge separator, pin mill and etc. The successful commissioning of the evaporation system once again proved the correct choice of Hebei Derui and the strength of Myande.

In view of the special nature of maltose syrup products, Myande repeatedly optimized the process and design plan according to customer needs, and the maltose evaporation system has been improved and optimized several times. Steam jet pump is applied in the five-effect falling film evaporation system to utilize the secondary steam generated by liquefaction, to achieve full utilization of thermal energy and greatly reduce the raw steam consumption. The evaporation system effectively reduces investment and operating costs for customer.

The previous evaporation system of Hebei Derui Starch Co., Ltd. was operated manually, and workers were required to frequently sample and switch valves. The evaporation system supplied by Myande supports on-line detection of discharged syrup concentration and automatic switching of discharge valve, which brings great convenience to the operation.

## 5th International Rice Bran Oil Conference

From May 24th to 25th, 5th International Rice Bran Oil Conference, sponsored by International Rice Bran Oil Association, was held in Hanoi, Vietnam. During the conference, Myande presented internationally advanced oils & fats engineering technology and had ample communication with experts, scholars and business people from twenty countries and regions. Main topics of

discussion include opportunities and challenges faced by the rice bran oil producers in the global market.

Rice bran oil, often famed as "Rice Gold" for its balanced nutritive value, is widely recommended by the World Health Organization as cooking oil. International Rice Bran Oil Association is non-profit and non-governmental organization. At the conference, Bingde Bai, chairman of the organization, said that the Rice Bran Oil Global Trade Commission will continue to create a fair trade environment for the global rice bran oil market and promote the promotion of rice bran oil.

China as world largest rice producer and consumer has obvious advantages in the supply of rice bran oil raw materials. Participants in the conference believe that the establishment of the Rice Bran Oil Global Trade Commission will bring about more opportunities for rice bran oil producers and related equipment and engineering service providers.

## Participants of Sunflower Oil & Meal Trade Conference Visited Myande

On June 27, 2018, upon completion of Shanghai International Sunflower Oil & Meal Trade Conference, over 40 participants of the conference visit Myande edible oil equipment manufacturing facilities and held in-depth discussions with Myande technical team on various topics relating to processing technology and development trend of sunflower oil industry.

Shanghai International Sunflower Oil & Meal Trade Conference was organized by APK-Inform, and was

cosponsored by Oliyar, EFKO, Wilmar International and Myande Group.

More than 200 experts from 18 countries participated in this conference. 14 industry experts gave keynote speeches on current status and outlook of global oilseeds and vegetable oil, market prospects of sunflower oil, processing technology and quality control of sunflower oil.

As the sponsor of this conference and leading provider of edible oil processing machinery and engineering services, Myande attended this conference. Myande representative delivered a keynote speech entitled "Optimal Project Execution Practice for Large Scale Crushing & Refinery Facilities". The guests responded enthusiastically and are impressed by Myande's ability to implement large-scale turnkey edible oil projects.

During the exhibition, representatives of Ukrainian Vegetable Oil Association, Kazakhstan Oils and Fats Association and Russian Vegetable Oil Producers Alliance visited Myande booth and highly commented on Myande's achievements in international market in recent years.

## Myande Exhibits at 2018 Watertech Shanghai

On May 31 to June 2, 2018, the 11th Aquatech China (Shanghai) Water Technology Exhibition, co-sponsored by RAI International Exhibition & Congress Centre and Shanghai CHC Expo was held in National Exhibition and Convention Center of Shanghai. The exhibition received strong support from Water Quality Association (WQA) and other associations and is generally regarded as the top exhibition in the wastewater treatment industry. Myande was invited to exhibit as the leading enterprise in the field of wastewater evaporation and crystallization.

Targeted at wastewater problems, Myande had ample face-to-face discussion with scholars, experts and business people attending this exhibition, and presents highly specialized solution scheme. In the field chemical wastewater treatment, Myande has many mature evaporation and project cases such as multi-effect evaporation, MVR evaporation and TVR evaporation. Myande is in a position to provide tailor-made technical solutions according to the specific conditions and needs of its customers.

## Myande Exhibits at China International Chemical Industry Exhibition

On May 16-18, 2018, West China International Chemical Industry Exhibition (hereinafter referred to as "West Chemical Industry Exhibition"), co-sponsored by Chongqing Chemical Industry Association and Chongqing Chemical Energy Conservation and Corrosion Prevention Technology Association, was held in Chongqing International Convention & Exhibition Center. With the theme of "Energy Innovation & Safe Development", this exhibition aims at presenting latest energy-saving products

and technical services in the chemical industry, changing the pattern of chemical industry development in western China, enhancing market competitiveness, and accelerating innovation of chemical industry and sustainable and healthy development by adopting advanced technology, intelligent equipment, eco-friendly technology. Myande was invited to exhibit as a famous enterprise in the field of evaporation and crystallization.
