

## YZ24B Streak Retinoscope( Rechargeable)

The product can quickly and precisely measure the astigmatism axis and is one of the necessary instruments in optometry inspection.

### Features

- ◆ The filament can be 360° rotated and move upward and downward.
- ◆ Astigmatism axis can be quickly and precisely measured.
- ◆ The light can be converged, radiated and paralleled.
- ◆ Brightness can be continuously adjusted.
- ◆ Recharging conveniently and quickly.
- ◆ Overcharge prevention protects the battery.
- ◆ Optional head of ophthalmoscope.
