
Band saw

Operation ways:

Please make sure you start fresh with a nice clean saw before using machine.

It's a good idea to be mindful before starting a cut and check if the blade you have on is the right one for the job.

The right blade tension set can make a big difference for your cut.

Make sure the guides are relatively close to the blade in order to make a good cut and the blade guard is at an appropriate level for your cut.

Keep it a priority to always release the tension when you're done with the saw.

Clean off any sawdust that might have gotten stuck.

Main technical parameter:

Blade: 3750mm*60mm*0.6mm

Sharpening stone: emery wheel

Cutting speed: 80-180cut/min

Supply voltage: 380V, 50Hz

Air source pressure: 0.6MPA

Total power: 7.5KW

Cutting size; length 50-210mm diameter: 40-135mm

Weight: 1500KG

Main features:

It adopts LCD touching screen to operate, Easy setting

Automatic knife sharpening system, safe cutting, no need labor costing

To be able to cut all kinds of core and coreless roll paper

To be able to configure tops and tails size flexibly

The machine owns advanced setting, stable performance, PLC programming control and servo motor.
