

# PROTABLE VISUAL ELECTROPHYSIOLOGY

—SK-4500A

- DIABETIC RETINOPATHY
- CHILD EXAMINATION
- ANIMAL EXAMINATION

## IMPEDANCE INDICATION

Real-time feedback of impedance values.  
Facilitates doctor operations.

## SKIN ELECTRODES

Adhesive design for easy placement of electrodes. Repetitive use, less consumables.

## PUPIL TRACKING

Real-time tracking of position and diameter changes.& Real-time adjustment of the flash.

## MULTIPLE EXAMINE

12 tests are supported, chosen according to the patient's needs.

## INDEPENDENT STORAGE

Independent storage of historical data for tens of thousands of patients.

# PARAMETERS

## EXAMINATION ITEMS

FlashERG: Dark-adapted0.01; Dark-adapted3.0; Dark-adapted3.0OPS;  
Dark-adapted10.0; Light-adapted3.0; Light-adapted3.0 Flicker

FlickerERG: DR;  
Flicker4.0 Td.s; Flicker4.0 Td.s; Flicker16.0 Td.s; Flicker32.0 Td.s

FlashFVEP

## BASIC PARAMETERS

Common mode rejection ratio: >100db  
Gain range: 1k, 2k, 5k, 10k, 20k, 50k, 100k  
Low frequency cut-off: 0.1Hz, 1Hz, 7.5Hz, 100Hz  
High frequency cut-off: 75Hz, 100Hz, 300Hz  
Curve capture time: 100-500ms

## FLASH STIMULATOR

White background light intensity: 0; 30; 75; 100 (cd/m<sup>2</sup>)  
Flash intensity: 0.01; 0.025; 3; 7.5; 10; 25 (cd.s/m<sup>2</sup>)  
Stimulus light, background light colour: White, red, blue, green  
Duration of flashing light: ≤5ms  
Frequency of stimulation: Single stimulation 0.05Hz, 0.1Hz, 0.5Hz;  
String stimulation 30Hz

## OTHERS

Human Machine Interaction: On-screen touch + button control  
Monitor: 2.8inch; 320\*240  
Printer: External access  
Operating system: Embedded Linux Systems  
Language: Chinese, English, Russian, Spanish
