◆◆ Special Needles

- ◆ Made of high quality stainless steel 304 or 316
- ◆ Producing all kinds of special needles required by our customers

Disposable Needles

- ◆ Made of high quality stainless steel
- ◆ With large ID and high flow
- ◆ Semi-transparent needle-hub for the convenient observation of blood reflux
- ◆ Delicately-designed needle-point with features of sharpness,smooth puncture,less damage to the tissue,less painful feeling to the patient
- ◆ Size distinguished by the needle-hub's color for the clear recognition
- ◆ The flexible supply form:in bulk or pack,sterilized or unsterilized
- ◆ Production of all kinds of special needles required by our customers
- ◆ Packing types:in bulk or in blister

◆◆ Safety Disposable Needles

◆ Product Use:

It can match with normal syringe in clinical injection of liquid medicine, which can effectively prevent the acupuncture accident.

Product Features:

1. It can match with all kinds of syringes with standard luer tip.
2. After injection, only need to push upward lightly or knock the safety protector, which can immediately achieve the purpose of protecting the needle tip.
3. Multiple protections, the safety protector will not be off accidentally.
4. Effective function and simple design can reduce the cost of safety injection.

Using step:

Assemble the safety needle on the luer tip of sterilized syringe.

Open the safety protector, which will open automatically under the elastic force.

Take off the protector pull the plunger lightly to absorb the medicine liquid.

After injection, apply upward force on the safety protector, which will return automatically under the elastic force.

Apply force continually until the safety protector covers the needle.

Medical waste storage.

◆◆ Scalp Vein Sets/Safety Scalp Vein Sets

- ◆ Types:normal type and safety type
- ◆ Delicately-designed needle-point with features of sharpness,smooth puncture,less damage to the tissue,less painful feeling to the patient
- ◆ With soft wings for the convenience of fixation
- ◆ With large ID and high flow
- ◆ Size distinguished by the wing's color for the clear recognition
- ◆ Safety scalp vein set with protective sheath on the tube
- ◆ Soft pulling after the infusion so that the needle can be pulled into the protective sheath so as to prevent the medical care persons hurt by the used needle.
- ◆ Needle-hub types:1.PVC hub;2.ABS hub
- ◆ Wing types:1.Single-wing ABS;2.Double-wing PVC
- ◆ Packing types:in bulk,PE package or in blister package

Blood Collection (Multi-Sample) Needles

1. Pen type blood collection needle:(type I)

- ◆ Latex Free
- ◆ Multi-sample needles permit several samples to be taken with a single puncture
- ◆ Sharp&smooth edges make penetration painless,easy connection to rubber stoppers

2. Pen type(flash back) blood collection needle(type II)

- ◆ Latex Free
- ◆ Multi-sample needles permit several samples to be taken with a single puncture
- ◆ Special design can observe the vein blood flash back.

3. Blood collection needle with scalp vein set (type III), Blood Collection needle with hypodermic needle(type IV)

- ◆ Latex Free
- ◆ Soft and transparent tube can observe the vein blood flow clearly.
- ◆ Double wings make puncture safe.
- ◆ Different color wings means different size.

type I type II ◆◆ Color codes and specifications

◆◆ Safety Blood Collection Set

- ◆ Safety blood collection set is a new designed safety products, which connect safety scalp vein set with blood collection components. After using, push the safety protector up to lock the needle tip in to the it, which will avoid hurting nurse or patients effectively. Both with holder or without holder is ok.

Types; Safety Blood Collection Set with holder and Safety Blood collection Set without holder

OPERATION METHOD

1. Push the safety cover forward over the needle after using up

2. Make butterfly part totally lock into slot of safety device

Safety Blood Collection Set

Safety Blood Collection Needle

Safety Blood Collection Needle pen type, can be supplied with or without holder, the design of safe protector cap can shield the cannula after use, prevent needlepoint from stabbing nurse, patient or other people, which can effectively reduce infection. This kind of safety blood collection needle is a safe substitute of the general blood collection needle for clinical application.

Intended Use

This kind of product which is used for blood collection is applicable for needle holder and vacuum tube for blood sample collection.

❖❖ Blood collection assembly Product Safety holder

❖ Safety holder is a new designed of safety product, can be used with pen type blood collection needle to collect blood samples. There are two types; Holder with safety sheath; quicke release holder. The design is aim to avoid nurse or patient injury efficiently.

❖❖ Holder with luer adapter

❖ There are three types: LH001, LH002 and LH003.

Spinal Needles

1. Extradural Anaesthesia needle(AN-E)

- ◆ Bend and round-smooth needlepoint can greatly reduce the risks of breaking the hard spinal theca and assure the cannula entering successfully.
- ◆ Graduation on cannula, convenient for control.
- ◆ Needle hub with wings, convenient to be hold and needles sticking into easily.

2. Spinal needles(AN-SI)

- ◆ Transparent hub, easy to observe the cerebrospinal fluid discharge.
- ◆ Hub with lock can keep the surface of needle bevel joint well.

3. Non-hurt Spinal needle(AN-SII)

- ◆ Special design for needlepoint will not hurt the hard spinal theca, close puncture hole automatically and reduce cerebrospinal fluid discharge.
- ◆ Suitable shape and location of side hole ensure enough flux, meanwhile reduce the happening of faulty retardance.

4. Nerve Anaesthesia needle(AN-N)

- ◆ Used for part anaesthesia, ease pain or injecting local anesthetic or first aid medication when in emergency.
- ◆ For single use only, avoid cross infection.

5. Pediatric anaesthesia needle(AN-X)

- ◆ Bend and round-smooth needlepoint can greatly reduce the risks of breaking the hard spinal theca and assure the cannula entering successfully.
- ◆ Graduation on cannula, convenient for control.
- ◆ Needle hub with wings convenient to be hold and needle sticking into easily.
- ◆ Small OD, greatly reduce the hurt on pediatric patients.
- ◆ Soft tube connecting with needle hub, easily use and safety.

◆◆ Epidural Needles

- ◆ Color coded hub easy for size recognition.
- ◆ Material: Quality Stainless Steel
- ◆ Core needle: Stainless Steel / Plastic available.
- ◆ Transparent hub convenient for observing outflow of cerebrospinal fluid.
- ◆ The needle tube is scaled for the purpose of depth control.

◆◆ Introducer Needles

- ◆ Medical grade stainless steel.
- ◆ Special designed needle hub for the convenience of operation and exact puncture
- ◆ With special designed needlepoint, doctor can control resistance freely for exact and smooth puncture
- ◆ Smooth inducing without block

◆◆ Color codes and specifications for hypodermic needle

I.V Catheter

- ◆ Easy dispenser pack
- ◆ Color-coded casing cap allows for easier identification of catheter size
- ◆ Translucent catheter hub and flashback chamber allows for easy detection of blood flashback at vein insertion
- ◆ Teflon Radio-opaque catheter
- ◆ Precision finished PTEE catheter assures stable flow and eliminates catheter tip kink during venipuncture
- ◆ Can be connected to syringe by removing filter cap to expose Luer taper end
- ◆ Use of hydrophobic membrane filter eliminates blood leakage
- ◆ Close and smooth contact between catheter tip and inner needle enables safe and smooth venipuncture
- ◆ Safety design can shield the cannula after use, preventing needlepoint from stabbing nurse ,patient or other people,which can effectively reduce infection.

◆◆ A.V Fistula Needles

- ◆ Fixed type, Rotating type, Safety type
- ◆ Ultra-thin wall needles allow maximum blood flow
- ◆ Ultra-sharp for easier penetration
- ◆ Siliconized for smoother, more comfortable penetration
- ◆ Easy removal of luer cap
- ◆ Double entry points on needle for quick collection
- ◆ A.V.fistula needle with safety device, can shield the cannula after use, preventing needlepoint from stabbing nurse, patient or other people, which can effectively reduce infection

◆◆ Safety pen needle

- ◆ Same use steps as normal insulin pen needles, no more operation,
- ◆ automatically achieve the function of protecting needle tip after use
- ◆ Match with normal insulin pen in market
- ◆ Pain-release triple bevel needle tip design, large flow thin wall cannula
- ◆ Available size: 30G/31G with length 5mm, 6mm and 8mm

◆◆ Huber Needles

◆◆ Structure and composition:

- ◆ The huber needles are assembled by protective cap, needle hub, needle tube, tubing, injection site, robert clamp and other parts. All materials meet medical requirement, sterilized by ETO, pyrogen-free.

◆◆ Material:

- ◆ PC, PP, PVC, SUS304 Stainless Steel Cannula, Silicone oil

◆◆ Intended use:

- ◆ The huber needle is intended to be used to feed medicine to the device implanted in patient hypoderm.

◆◆ Types:

- ◆ Huber needle with wing: with Y port and without Y port
- ◆ Huber needle with air-vent hub
- ◆ Huber needle with disposable needle: Straight huber needle, 90 degree curved huber needle

Mesotherapy needle

- ◆ Made of high quality stainless steel
- ◆ With large ID and high flow
- ◆ Delicately-designed needle-point with features of sharpness, smooth puncture, less damage to the tissue, less painful feeling to the patient
- ◆ Size distinguished by the needle-hub's color for thr recognition
- ◆ Sterilized: by EO

❖❖ Hair transplant needle

❖❖ Structure and composition:

- ◆ The Hair transplant needle consist of needle hub, needle tube, Protective cap. All materials meet medical requirement, sterilized by ETO, pyrogen free.

❖❖ Material:

- ◆ PP, SUS304 Stainless Steel Cannula, Silicone oil

❖❖ Intended use:

- ◆ The Hair transplant needle is used for single hair follicle transplantation. The hair follicle is directly inserted into the skin for implantation.

❖❖ Specifications:

- ◆ 0.6mm,0.8mm,1.0mm,1.2mm

❖❖ Low Dead Space Needle

- ◆ Low Dead Space needles may help to reduce the risk of blood borne virus transmission by significantly reducing the dead space in a syringe, therefore minimising exposure to potentially contaminated blood fluid.

◆◆ Veress Needle

- ◆ Veress Needles are designed for the safe, simple, effective creation of the pneumoperitoneum.
- ◆ Big size spring-loaded stylet provides loud audible "click" when passing through tissue layers
- ◆ Visible red indicator of needle position
- ◆ Sharp tip for easy insertion
- ◆ High flow stopcock
- ◆ Two sizes with 120/150mm length are available

◆◆ Biopsy Needle

- ◆ Full notch exposure
- ◆ Bevel tip—one of the sharpest standard tips in its class
- ◆ Needle is etched with depth marks with the tip enhanced to maximize scanning visibility
- ◆ Made with the strongest spring in use to insure adequate cut-off of a full tissue sample
- ◆ Ergonomic design with great comfort and control
- ◆ Each needle individually sterile-packed in a convenient and easy-to-open pouch

◆◆ Chiba Needles

- ◆ Depth marker that stays where you put it
- ◆ Locking hub for ease of handling, no stylet and cannula separation until you want it
- ◆ Depth marks etched on cannula
- ◆ Palpable alignment markings on hub for easy orientation

◆◆ Bone Marrow Biopsy Needles

- ◆ Special Trocar needle and sharp tubing ensure minimal invasion.
- ◆ 5 side holes at front end of tubing, multi-way collect bone marrow, more efficient and less pain.
- ◆ Human ergonomics handle, comfortable and easy operation.
- ◆ Provide one more needle, ensure sharpness and less pain when multi-point invasion.

Irrigation needle

- ◆ Multi angle bended, easy for cleanout, can be used for different occasion.
- ◆ Different type, client can choose products according to irrigation part.

Dental irrigation needle

- ◆ Made of high quality stainless steel.
- ◆ Blunt end, soft needle .straight or Pre-Bent Tips resists crimping.
- ◆ Universal luer lock style hub.
- ◆ Extended 3/4" length to reach pockets, fistulas and surgical sites.
- ◆ Different color Hub to identify different gauge.
- ◆ Sterilized by EO,non-toxic,non-pyrogenic.

◆◆ Special Plastic Needle

All of the needle is plastic, without any metal material, special design for special use.

◆◆ Polycarbonate Syringe

- ◆ Polycarbonate syringe barrels create a "smooth as glass" feel and help increase the visualization of fluid and air bubbles.
- ◆ Different colors to meet different choice
- ◆ Multiple Sizes: 1, 2, 3, 6, 10, 20, 30 & 60ml
- ◆ Customized Printing: All medication names can be printed directly on the syringe barrel in white or black ink.
- ◆ Luer Options: Fixed Male Luer or Slip Luer

❖❖ Syringe/Safety Syringe

- ◆ The Syringe/safety syringe (with/without needle, needle can be normal or safety) are assembled by barrel, plunger, piston, with/without hypodermic needles, which can be classified to central nozzle type and side nozzle type according to the prick connector. It has three parts and two parts according to structure. All parts and material for this product meet medical requirements, after sterilized by ETO, pyrogen free.
- ◆ Different size, meet different requirements.
- ◆ Central luer slip/central luer lock/eccentric luer slip.
- ◆ Special design to prevent plunger slipping out.
- ◆ Latex/ latex free piston.
- ◆ W/needle, W/O needle.
- ◆ Custom needle size per specification.

❖❖ Insulin Syringe

- ◆ The Insulin Syringe are assembled by needle protective cap, needle tube, barrel, piston, plunger, protective cap. All parts and materials used in this can meet medical requirement. Sterilized by ETO, pyrogen-free. It is applicable injection after taking out insulin. According to the size, it can be specified to: U-40, U-100.
- ◆ The high transparency of the barrel permits the end user a strict control on the foreign substance and liquid flow.
- ◆ The inerasable graduation permits an easy reading, 40 unites and 100 unites are available.
- ◆ The medical grade silicon oil is used as the lubricant the purpose of getting a smooth plunger movement.
- ◆ Sterilized by EO gas, non-toxic, non-pyrogenic, single use only.
- ◆ Material for barrel and plunger: medical grade PP
- ◆ Material for gasket: natural rubber/latex-free

Detailed specifications

I.U.	COLOR	NEEDLE SIZE	REF
U - 40	Red	29G	02 - 601
		30G	02 - 602
		31G	02 - 603
U - 100	Orange	29G	02 - 604
		30G	02 - 605
		31G	02 - 606

Normal size in above table, we can also make special size as client's request.

◆◆ Enteral Syringe

The Enteral syringe is used for delivering drug or food to oral or enteral

◆◆ Structure and composition:

- ◆ The Enteral syringe are assembled by Barrel, Plunger, Piston. All parts and material for this product meet medical requirements, after sterilized by ETO.

◆◆ Material:

- ◆ PP, Isoprene rubber, Silicone oil

◆◆ Specifications:

- ◆ 1ml,3ml,5ml,10ml,20ml,60ml,100ml

◆◆ Oral Syringe

Oral syringe for single use are intended for oral administration of drugs.

◆◆ Structure and composition:

- ◆ The oral syringe are assembled by Barrel, Plunger, Piston. All parts and material for this product meet medical requirements, after sterilized by ETO.

◆◆ Material:

- ◆ PP, Isoprene rubber, Silicone oil

◆◆ Specifications:

- ◆ 1ml,3ml,5ml,10ml,20ml

NR-fit Syringe

Structure and composition:

- The NR-fit syringes are assembled by Barrel, Plunger, Piston. All parts and material for this product meet medical requirements, after sterilized by ETO, pyrogen free.

Material:

- PP, Isoprene rubber, Silicone oil

Anaesthesia Needles

Structure and composition:

- The Anaesthesia needles consist of needle hub, needle tube(inner), protector cap. Major categories: Spinal anesthesia needles, Epidural anesthesia needles, Combined anesthesia needles.

Material:

- PP, PC, ABS, SUS304 Stainless Steel Cannula, Silicone Oil.

◆◆ NR-fit Stopcocks

◆◆ Structure and composition:

- ◆ The NR-fit Stopcocks are assembled by stopcock body, Locking screw. All parts of this product and processing of materials are used in line with requirements of medical materials, after sterilized by EO, pyrogen free.

◆◆ Material:

- ◆ PCTG, HDPE

◆◆ NR-fit Extension Sets

◆◆ Structure and composition:

- ◆ The NR-fit Extension sets are assembled by NR-fit adapter, Robert lock clamp, tube. All parts of this product and processing of materials are used in line with the requirements of medical materials, after sterilized by EO, pyrogen free.

◆◆ Material:

- ◆ PCTG, PVC, POM/HDPE.
