Description

Application

Slow inventory, inconvenient locating and troublesome authorization are the pain points of traditional document management. RFID Filing Cabinet is developed by Pinguan to solve such problems. Mainly used in banks, governments, and offices. It's integrated with a metal cabinet, RFID system, and computer system. When someone wants to take the file out, just get the permission by finger print or face recognition, input the key words of the document, and the cabinet will open and shows the exact positon with an indicator light. No time is wasted for searching any more. Also, the authorization can be made remotely by APP.

- High accuracy of document identification up to 100%
- Automatic and quick inventory of documents
- Support long-distance control of opening and closing with an APP
- Support disordered input & output
- System can be expanded with multiple interfaces

Parameter

Name:	RFID Filing Cabinet	**Model:**	PG-CT-ST0201
Material:	Cold rolled steel	**Color:**	
Dimensions:	1,750×800×450mm	**Working Temperature:**	-20°C/+60°C

Volume:	100*5 PCS	**Precision:**	Item-level
Indicator:	LED	**Inventory Rate:**	≥1,000 PCS / min
Accuracy:	100%	**Power Supply:**	AC220V
Inventory Mode:	Active or passive inventory	**Lock Control:**	Electronic
Interface:	RS232,RJ45,TCP/IP	**Emergency Mode:**	Mechanical key
Monitoring:	Real-time
