

Hydraulic Pile Breaker

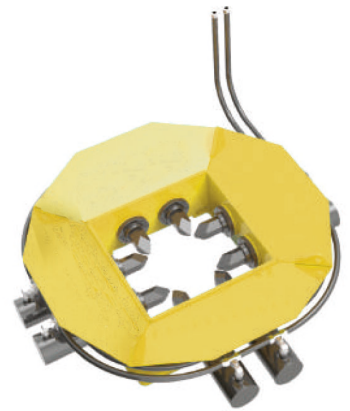

ANTENG hydraulic pile breaker/cutter ,with five patented technologies ,is the most efficient equipment to crushing the foundation piles . Using advanced modular design ,it can be used for crushing piles of different diameters by changing the module combination quantity . It can be installed on the large variety of construction machinery ,realizing the versatility and economy.

 Convenient
  Stable
  Efficient
  Economic

FEATURES:

1. Simple operation with less staff , reducing cost
2. Crushing piles wholly ,reducing energy consumption
3. Full hydraulic drive ,low noise
4. With adjustable chain the pile breaker can be applied to different condition

TJS500S SPECIFICATION

Pile length	mm	400-500
Max. Rod pressure	Kn	280
Max. Cylinder stroke	mm	135
Max. Crowd pressure	Mpa	34.3
Max. Single cylinder flow	L/min	20
Quantity/8h	/	200/8h
Max. Single cutting height	mm	≤300
Applicable excavator class	Ton	≥10
Operating size	mm	1588*1588*1500
Overall weight	Ton	0.8
